About

Business Intelligence and Data Analytics professional with over six years of experience delivering enterprise reporting, data integration, and analytics solutions across the telecommunications, construction, and manufacturing sectors. Strong background in dashboard development, automated reporting, and data integration pipelines that support operational and strategic decision-making. Experienced in data governance, process improvement, and cross-functional stakeholder collaboration. Currently undertaking a Master of Business Analytics at Monash University as an Australia Awards Scholar, further strengthening advanced analytics and data-driven decision-making capabilities. Interested in BI, analytics, and data leadership roles where analytics drives measurable business impact and scalable decision-making.

Reporting & Enterprise Systems
- Microsoft SSRS, SSAS
- Excel (Advanced), PowerPoint, Visio

Professional & Leadership Skills
- Stakeholder Management
- Requirement Gathering & Business Translation
- Process Improvement & Decision Support

Certification
- SQL (TestDome Certified: Top 10%)

Experience

1. **Australia Awards Scholar (Full-time Scholarship) | Australia Awards | Aug 2024 – Now**
   Description:
   - Received a highly competitive, merit-based Australia Awards Scholarship to pursue a full-time Master of Business Analytics at Monash University.
   - Undertaking advanced coursework and applied analytics projects in business analytics, data analysis, statistical reasoning, and data storytelling to support data-driven decision-making.
   - Engaging in leadership development, professional capability building, and cross-cultural collaboration through the Australia Awards network, strengthening communication and stakeholder effectiveness in diverse environments.

2. **Data & Reporting Specialist Manager | Centratama Group | May 2022 – Dec 2024**
   Description:
   - Managed enterprise Business Intelligence and reporting operations using Power BI, enabling timely and accurate insights for management and multiple business units.
   - Designed and maintained data integration pipelines using Pentaho, consolidating data from multiple source systems into a central reporting environment.
   - Managed MySQL databases and ensured data quality, consistency, and availability for analytics and reporting.

YUSUF KURNIA ROMADHON

yusufkurniaromadhon@gmail.com | +61451494449 | Yusuf Kurnia Romadhon | Melbourne, Australia

- Delivered ad hoc and recurring data analysis to support operational and strategic decision-making across multiple departments.
- Developed and implemented reporting automation, significantly reducing manual reporting effort and improving turnaround time for reporting.
- Established data governance frameworks by creating Letters of Authorisation (LOA) and Standard Operating Procedures (SOP), thereby improving control, accountability, and audit readiness.
- Collaborated closely with cross-functional stakeholders to identify reporting requirements and continuously improve existing systems.

3. Data Engineer Tableau Expert | BCI Central | November 2020 – May 2022

Description:

- Managed and administered Tableau Server, supporting internal analysts and external clients throughout Australia, New Zealand, and Asia.
- Designed and maintained data integration and database environments to support large-scale analytics and BI applications.
- Played a key role in developing Analytix, a commercial analytics and dashboard product that provides strategic insights into construction activity by sector, stage, and location.
- Built interactive Tableau dashboards covering relationship mapping, key market players, market trends, milestones, sector and company comparisons, demand by location, and network mapping.
- Delivered analytics and visualization solutions to support executive decision-making for construction and infrastructure clients.
- Conducted training sessions and provided ongoing support to internal teams and external customers to ensure effective use of analytics products.
- Collaborated with cross-functional and international stakeholders to continuously improve product features and data quality.

4. IT Development (Business Intelligence & Data Warehouse) | PT. Asahimas Flat Glass Tbk. | Jan 2018 – Dec 2020

Description:

- Supported the development and operation of Business Intelligence solutions in Tableau, delivering dashboards for production, accounting, logistics, sales, and administration teams.
- Designed and maintained databases and data warehouse environments using SQL Server, Oracle, and DB2, supporting enterprise reporting and analytics.
- Contributed to building a data environment for a smart factory initiative, improving visibility into production processes and operational performance.
- Developed and maintained internal systems using C#, ASP.NET, SQL, and SSRS to support asset management, issue tracking, and reporting.
- Conducted user training and provided ongoing support to improve BI adoption and data literacy across departments.
- Collaborated closely with business users to gather requirements and translate operational needs into data-driven reporting solutions.

5. IT Functional Staff | PT. AMS-KMT (KPN Corp) | Jul 2016 – Dec 2017

Description:

- Supported operational and budgeting systems across multiple plantation and mill companies within the group.
- Worked closely with system users to gather requirements, resolve operational issues, deliver user training, and support reporting and data analysis.
- Delivered user training and system implementation support for budgeting and operational systems across 5+ group companies.
- Contributed to the successful implementation of a group-wide budgeting system, supporting user adoption, readiness, and operational continuity.
