YUSUF KURNIA ROMADHON

yusufkurniaromadhon@gmail.com | +61451494449 | Yusuf Kurnia Romadhon | Melbourne, Australia

About

Business Intelligence and Data Analytics professional with over six years of experience delivering enterprise reporting, data integration, and analytics solutions across telecommunications, manufacturing, and construction-related data environments. Strong background in dashboard development, automated reporting, and data integration pipelines that support operational and strategic decision-making.

Experienced in data governance, process improvement, and cross-functional stakeholder collaboration. Currently undertaking a Master of Business Analytics at Monash University as an Australia Awards Scholar, further strengthening advanced analytics and data-driven decision-making capabilities. Interested in BI, analytics, and data science roles where robust systems and governance drive measurable business impact and scalable decision-making.

Portfolio

Data analytics portfolio featuring interactive dashboards, statistical modelling, and end-to-end business insights.

Education

Master of Business Analytics
Monash University, Australia
2025 – 2026 (Expected Dec 2026)
Award: Australia Awards Scholarship
WAM: 78.33/100 (GPA Equivalent: 3.33/4.00)

Bachelor of Information Systems
Institut Teknologi Sepuluh Nopember (ITS), Indonesia
Completed: Feb 2016
Award: Best IT Project by Client (Final Project Assessment)
GPA: 3.62/4.00

Experience

1. **Australia Awards Scholar (Full-time Scholarship) | Australia Awards | Jan 2025 – Now**
   - Awarded a highly competitive, merit-based scholarship to pursue a Master of Business Analytics at Monash University.
   - Applying advanced analytics (data analysis, statistical modelling, and data storytelling) to real-world business problems.
   - Demonstrating leadership and cross-cultural engagement as an ILLA Ambassador, teaching Indonesian language and supporting international student initiatives.

2. **Data & Reporting Specialist Manager | Centratama Group | May 2022 – Dec 2024**
   - Led enterprise BI and reporting transformation by digitising manual Excel-based KPI reporting into Power BI dashboards, significantly reducing reporting turnaround time and improving data accuracy and consistency.
   - Designed and implemented data integration pipelines (Pentaho) to consolidate multiple data sources into a centralised reporting system.
   - Improved data quality and consistency by managing MySQL databases and establishing structured data models for analytics.
   - Delivered ad hoc and recurring analysis to support operational and strategic decision-making across business units.
   - Developed reporting automation to reduce manual effort and enhance the efficiency of reporting processes.
   - Established data governance practices (LOA, SOP) to strengthen control, accountability, and audit readiness.
   - Collaborated with cross-functional stakeholders to define reporting requirements and continuously improve analytics systems.

3. **Data Engineer Tableau Expert | BCI Central | November 2020 – May 2022**
   - Developed the initial **Analytix product demo (Tableau)**, contributing to customer growth from ~50 to 150 users by enabling data-driven exploration of construction projects.
   - Played a key role in building **Analytix**, a commercial analytics platform providing insights on construction activity by sector, stage, and location.
   - Translated core Tableau dashboards into a production C++-based system, supporting the transition from prototype to a scalable web platform now deployed to customers.

YUSUF KURNIA ROMADHON

yusufkurniaromadhon@gmail.com | +61451494449 | Yusuf Kurnia Romadhon | Melbourne, Australia

- Designed and maintained data integration and database environments to support large-scale analytics and BI applications.
- Built interactive dashboards covering market trends, key players, project pipelines, and geographic demand to support client decision-making.
- Delivered analytics solutions and training for internal teams and external clients across Australia, New Zealand, and Asia.
- Collaborated with cross-functional and international stakeholders to continuously improve product features and data quality.

4. IT Development (Business Intelligence & Data Warehouse) | PT. Asahimas Flat Glass Tbk. | Jan 2018 – Dec 2020

- Led the digitisation of manual reporting processes across finance, procurement, production, sales & marketing, and HR by implementing BI dashboards, significantly reducing reporting time and manual effort.
- Reduced overtime and repetitive tasks by automating reporting workflows, enabling employees to focus on analysis, strategy, and process improvement.
- Designed and maintained data warehouse and database environments (SQL Server, Oracle, DB2) to support enterprise reporting and analytics.
- Contributed to smart factory initiatives by improving visibility into production processes and operational performance.
- Developed and maintained internal systems (C#, ASP.NET, SSRS) to support asset management, issue tracking, and reporting.
- Delivered user training and collaborated with business stakeholders to improve BI adoption and translate operational needs into data-driven solutions.

5. IT Functional Staff | PT. AMS-KMT (KPN Corp) | Jul 2016 – Dec 2017

- Supported the implementation of a group-wide budgeting system across ~80 plantations and ~15 mills, ensuring system adoption and operational readiness.
- Delivered user training and system support for budgeting and operational systems across multiple business units.
- Worked closely with business users to gather requirements, resolve system issues, and support reporting and data analysis.
- Contributed to operational continuity by supporting system implementation and improving user adoption across the organisation.

Skills

Business Intelligence & Analytics

- Power BI, Tableau
- Dashboard Development & Data Storytelling
- KPI Design & Executive Reporting

Programming & Data Science

- R (Data Analysis, Visualisation, Statistical Modelling)
- Python (Data Analysis, Automation), Git

Governance & Process

- Data Governance
- Data Quality Management
- Process Improvement

Languages

- English (Professional Working Proficiency)
- Indonesian (Native)

Data Engineering & Integration

- SQL (Microsoft SQL Server, MySQL, PostgreSQL)
- ETL & Data Integration (Pentaho, SSIS)
- Data Modelling & Data Quality

Professional & Leadership Skills

- Stakeholder Management
- Requirement Gathering & Business Translation
- Process Improvement & Decision Support

Certification

- SQL (TestDome Certified: Top 10%)
- Introduction to Python for Data Science (Hacktiv8 Indonesia)
- Tableau for Data Science with R and Python Integration (Udemy)
